Research Interests: Machine Learning, Computational Creativity, Natural Language Processing, Computer Vision

Education

Manipal Institute of Technology **2022 – 2026**
Bachelor of Technology - Computer Science; CGPA: 8.65 *Manipal, Karnataka*

Precidency Global School **2020 – 2022**
Class XII; CGPA: 9.62 *Patna, Bihar*

Experience

AI Analyst Intern **Jan 2026 – Present**
Impact Analytics *Bangaluru, Karnataka*

- Developing ML-driven pricing and demand forecasting models for retail optimization using large-scale transactional datasets
- Building predictive models and data pipelines for pricing analytics and demand prediction

Software Engineering Intern **May 2025 - July 2025**
Yes Bank Ltd. *Mumbai, Maharashtra*

- Led a team of interns in testing and quality assurance of enterprise platforms, documenting bugs, validating workflows, and collaborating with developers to resolve key issues.
- Designed and enhanced SharePoint-based internal workflow systems and automated business processes using Power Automate, contributing to greater operational efficiency and reliability.

Machine Learning Engineer Intern **December 2024 – January 2025**
Alethe Labs *Gurugram, Haryana*

- Developed a **Corrosion Condition State Classification model** using ResUnet with multihead attention to segment infrastructure damage into four severity levels.

Undergraduate NLP Research Intern **June 2024 – July 2024**
MIT, Manipal *Karnataka*

- Developed models analyzing lyrical structures using NLP and fractal pattern visualization.
- Worked with transformer models and embeddings including BERT, Word2Vec, and Doc2Vec.

Projects

- **SetuAI – AI-Powered Compliance Engine**: (PostgreSQL, Node.js, React, Google Gemini OCR) Built a full-stack SaaS platform to automate compliance verification with live government API checks, role-based dashboards, and risk scoring, achieving 70% faster vendor onboarding and improved compliance transparency.
- **Neural Style Transfer for Artistic Image Generation**: (CNNs, VGG-19, ImageNet) Developed a Deep Learning model to generate aesthetically pleasing and contextually significant images in the style of various Impressionism artists, leveraging low-level and high-level feature extraction.
- **Image Processing Application**: (Java, CSS, JavaFX) Created an application with multiple image filters, histogram-based analysis, and compression, with an attractive GUI built using OOP principles.
- **Property Management System**: (Python, SQL, Rich) Built a comprehensive application for tenant/lease management, maintenance tracking, and secure storage of property-related documents.

Technical Skills

Languages: Python, Java, C, HTML, CSS, JavaScript, SQL

Technologies/Frameworks: PyTorch, TensorFlow, Hugging Face Transformers, Git, PowerBI, JavaFX

Relevant Coursework: Data Structures & Algorithms, OOP, Operating Systems, Database Management, Computer Architecture, Embedded Systems, Software Engineering

Leadership & Achievements

- **SAP Hackfest'25 – Special Award**: Ranked in the Top 5 among 25 000 students, 4,000 teams across 20 state hubs; won special award for developing *SetuAI*, an AI-powered vendor compliance platform.
- **IAESTE Manipal (International Association for the Exchange of Students for Technical Experience)**: Served as an LC member, developing leadership, teamwork, and communication skills; organized Namaste Manipal'23, a week-long flagship event welcoming interns from around the world.
- **Revels MIT Sponsorship Team (Cultural Fest of MIT)**: Contacted potential sponsors, created sponsorship packages, and negotiated terms; secured sponsorship from Lifestyle, providing clothing, accessories, vouchers, and gift cards for the Fashion Event.
